1. An aluminum factory is located between Tatabánya and Felsögalla (Q48/Z04). Three shifts, 2,400 men altogether, work here. There are five large smelters in the main building. The aluminum is sent to the Soviet Union in block form. The electrical power station is fueled with lignite. It was enlarged during the summer of 1951.
2. The Tatabánya coal mine, shaft No. XV is producing 600-700 mine-cars daily, against a planned quota of 1,100. There are 540 miners, working in three shifts. Shortage of mine timber frequently causes layoffs. The feeling among the miners is bitter. They get no more than 650-700 Forints a month. At the commissary they receive weekly 1.2 kg of flour, .5 kg of sugar, .3 kg of margarine, .3 kg of bacon and .25 kg of meat.
